

**NSTAR Gas**  
**Energy Efficiency Program Changes**  
**Commercial & Industrial Programs**

<b>Program Name</b>	<b>Program Year 2002</b>	<b>Modifications Planned for Program Year 2003</b>
<b>Custom</b>	Program offered incentives for condensing equipment only.	Expand incentive eligibility to include boilers having documented thermal efficiencies in excess of 85%.
<b>Infrared Rebate</b>		No Modifications Planned for Program Year 2003.
<b>High Efficiency Heating Rebate</b>	\$200 per furnace installed with AFUE rating $\geq$ 90%	Beginning this year, the program will offer a \$400 mail-in rebate for the installation of high efficiency gas furnaces at the 92% Annual Fuel Utilization Efficiency level equipped with electronic commutated motors, or equivalent advanced furnace fan system. This program will be offered in conjunction with participating electric energy efficiency program administrators. (All other rebates remain the same).
<b>High Efficiency Water Heating Rebate</b>		No Modifications Planned for Program Year 2003.

**NSTAR Gas**  
**Energy Efficiency Program Changes**  
**Commercial & Industrial Programs**  
**(continued)**

<b>Program Name</b>	<b>Program Year 2002</b>	<b>Modifications Planned for Program Year 2003</b>
<b>Building Operators Certification</b>	NSTAR Gas provided financial support for education and training initiatives administered by NEEP.	The Company completed its three-year financial commitment to NEEP for this program in 2002 and will not be providing financial support in 2003. However, the Company will still support the program through in-kind services, such as promoting awareness and participation through customer and industry contacts.
<b>Massachusetts Building Code Support</b>		There are no modifications currently planned for the Program Year 2003. However, in addition to continued sponsorship of training and outreach efforts on changes to Chapter 13 of the Commonwealth of Massachusetts building energy code, NSTAR Gas plans to take advantage of additional partnership opportunities to increase education, support, and adherence to commercial building codes.
<b>Market Transformation</b>	NSTAR Gas did not offer this pilot program in 2002.	High Efficiency Foodservice Pilot – A pilot program for restaurants and other food service facilities installing documented high efficiency gas-fueled deep fat fryers will be offered in 2003. The rebate (initially) will be prescriptive with a \$200 rebate for a 2 bay fryer and \$400 for a 3 bay fryer.
